Career Objective

I am a dedicated developer with a passion for creating innovative and efficient solutions. I excel in delivering impactful projects, enhancing technical skills, and driving organizational success. My expertise in programming and project development enables me to contribute effectively in fast-paced environm

Technical Skills

- **Python:** Clean and efficient Python code for backend development. OOP, FUNCTIONAL PROGRAMMING, FILE HANDLING, EXCEPTION HANDLING etc.
 - **Data Science:** Knowledge of data cleaning, visualization, and basic machine learning using Pandas, NumPy, and Matplotlib.
 - **Django:** Building dynamic web applications using the Django framework following MVT architecture.
 - **REST API:** Skilled in developing and integrating RESTful APIs for frontend-backend communication.
 - **Data Scraping:** Experience in web scraping using libraries like BeautifulSoup and Scrapy to extract, process, and analyze data from websites efficiently.
 - **Linux:** Basic knowledge of Linux operating system, command-line usage, file permissions, process management, and server-side environment handling.
 - **MySQL:** Hands-on experience in managing databases, writing SQL queries, and performing CRUD operations.
 - **HTML5:** Good in creating structured and responsive web pages using semantic HTML5.
 - **CSS:** Capable of designing visually appealing and responsive layouts using CSS.
 - **AI Tools:** Utilize modern AI tools for coding assistance, content generation, problem-solving, and project acceleration.
 - **Tools :** Postman, VisualStudio, GitHub, PyCharm.
 - **Language :** Learning Japanese language .
-

Work Experience

Python Developer Intern | Kiran Academy (Aug 2024 – Feb 2025):

Completed an internship as a Trainee Developer where I contributed to building a web-based Online Exam System using Python, Django, and MySQL. Gained practical experience in backend development, database handling, and implementing MVT architecture. Developed strong skills in clean coding, debugging, and collaborative project execution.

Education

Bachelor of Business Administration (BBA) – Computer Applications

CMCS College, Nashik | Savitribai Phule Pune University

2021 – 2024

Higher Secondary Certificate (HSC)

Maharashtra State Board | 2020 | 60.77%

Secondary School Certificate (SSC)

Maharashtra State Board | 2018 | 57.20%

Technical Projects

Console, Functional and OOP's Programming Based Projects

Student management System

-This Python-based Student Management System is a console application that allows users to manage student records through a menu-driven interface. It supports operations such as adding, displaying, updating, deleting, and filtering student data, all stored in an in-memory dictionary.

Online Assesment System

Technologies: Python, Django, MySQL

- Developed a web-based exam platform using Django and MySQL, allowing students to take exams, view results, and track performance
 - Implemented features such as user authentication, real-time exam taking, and automated grading for enhanced user experience
 - Enabled teachers/admins to manage exams, questions, and view detailed performance analytics
